

ANNUAL BONUS UPDATE FOR PRU LIFE MAXI ANNUITY SUB-FUND

As a valued customer of a participating policy from Prudential Assurance Company Singapore (Pte) Limited, we are pleased to provide you with this Annual Bonus Update.

The purpose of this report is to present you with an update on the performance of the Pru Life Maxi Annuity Sub-Fund ('Fund') for the year ending 31 December 2015 and the bonuses allocated for the year. It also sets out our views on the future outlook of the Fund based on our latest actuarial investigation of policy liabilities carried out under section 37(1) of Insurance Act and updates you on any changes in future non-guaranteed benefits.

If you would like to know how a participating fund operates in general, a copy of *Your Guide to Participating Policies* is available on Prudential's website (www.prudential.com.sg) or you may request for a copy from your Financial Consultant.

What are the benefits of your participating policy?

The benefits of your participating policy are made up of guaranteed and non-guaranteed benefits. The non-guaranteed benefits may be in the form of the following according to your policy's Terms and Conditions:

- **Reversionary Bonus** is an annual bonus added to your policy benefits, from the start of the calendar year after your policy has started accumulating bonuses. Once declared, it will form part of the guaranteed benefits of the policy.

What are the risks that affect the level of bonuses and how are the risks shared?

The level of bonuses depends on the actual experience and future outlook of key factors affecting the performance of the Fund. The key factors include investment performance and future investment outlook of the Fund, claims experience (with respect to Death), surrender experience and level of expenses incurred by or allocated to the Fund.

In determining the level of bonuses that can be supported, the assets available to back the policy will be derived by accumulating the premiums paid at the actual rate of investment return less the cost of insurance, expenses incurred, commissions paid, taxes and other costs that may be incurred in managing the Fund.

How are bonuses smoothed over time?

As investment performance fluctuates over time, bonuses are smoothed to ensure stable medium to long term returns on your policy. As a result, some of the investment returns in good years may not be distributed immediately so as to smooth out the returns in years where the investment return is low. However, the extent of smoothing is constrained by a limited deviation of the Fund's performance, and without affecting the Participating policyholders' benefits in the long-term.

Asset Allocation

The Strategic Asset Allocation and Actual Asset Allocation of the Fund as of 31 December 2015 are as follows:

Strategic Asset Allocation

Actual Asset Allocation

¹ Other assets include cash

Investment Performance of the Fund

Investment performance is a key factor that determines the level of bonuses.

Bond yields were mixed globally due to diverging central bank policies. Following the US Fed rate hike in December 2015, Singapore bond yields experienced the same fate. In spite of the rising yields, bonds generated a modest positive return in 2015.

Overall, the investment performance of the Fund was largely in line with expectation. Therefore, Prudential is able to maintain the bonus rates for all policies under the Fund for the performance up to the financial year end of 2015.

The investment return and investment expense ratio over the past 3 years are as follows:

Year	Investment Return ²	Investment Expense Ratio ³
2013	2.7%	0.14%
2014	4.7%	0.14%
2015	2.7%	0.14%

Source: Sub-Fund's financial statement.

² This investment return is shown after deducting investment expenses incurred in managing the Fund. Past performance is not necessarily indicative of future performance.

³ Investment expense ratio is defined as the costs incurred in investment (which would include investment fees paid to fund managers for providing fund management services) expressed as a percentage of the size of funds under management.

For comments on the investment outlook going forward, please refer to the Future Outlook section. You may also refer to the enclosed Bonus or Policy Notice (where applicable) for details of your policy's projected benefits.

Other Areas of Performance

Operating expenses, insurance claims and surrender experiences are the other key factors that affect the level of bonuses.

For the year 2015, there were no insurance claims under the Fund. The operating expenses and surrender payments under the Fund were higher than expectations. These short-term fluctuations are not expected to significantly affect current and future bonuses.

Assets and Benefits in 2015

Your policy is written out of the Fund which has a size of S\$80 million as at 31 December 2015. Benefit payments of S\$9 million were made out to policyholders in 2015, with the following breakdown:

Insurance Claims	-
Survival Benefit Payments ⁴	S\$214,826
Surrender Payments	S\$9,199,393

Source: Sub-Fund's financial statement.

⁴ It includes Annuity benefits only.

Future Outlook

2015 has proven to be a difficult year for investment where equities, bonds, commodities and cash all generated poor returns. The uncertainties in global markets remained as we enter 2016, with signs of stresses in major capital markets and economies. These uncertainties or any other unexpected surprises can deteriorate, sending capital markets and economies into a tailspin. Amidst this backdrop, one can expect capital markets are always fraught with uncertainties, and volatility is not uncommon. Long term investors should look through these short term volatilities and focus on long term prospects of investing.

While the economies remain volatile, the asset allocation for the Fund aims to deliver the current expected level of investment returns. In line with our bonus philosophy, we will continue to manage the Fund prudently to protect the interests of all Participating policyholders and aim to provide stable medium to long term returns on your participating policies. This will be done through a combination of guaranteed and non-guaranteed benefits where non-guaranteed benefits are smoothed over time.
